

Technical Factsheet | Nossana Project

The Project

This initiative is being implemented in the Bergamo area at the **Nossana spring**, one of the main sources of drinking water in the Province of Bergamo. The project involves the construction of a filtration plant, developed in collaboration with the relevant local authorities, with the objective of supporting water resource management and ensuring the operational continuity of the system under specific weather conditions.

Investment

Total investment: €11 million

Investment Timeline

2023-2024 | €323,000

During 2023-2024, all preliminary activities required to obtain the necessary permits for the project were completed. In particular, the technical and economic feasibility design phase was finalized.

2025-2027 | €10,580,000

Construction of the filtration plant serving the Nossana spring. Upon completion of commissioning and testing activities, the plant will be transferred to UNIACQUE.

2028-2030 | €105,000

Annual contribution of €35,000 to UNIACQUE to support maintenance activities for the plant.

Expected Benefits

- Construction of a filtration plant serving the Nossana spring and the users supplied by the associated water distribution network.
- Support for the continuity of drinking water services under weather conditions that may cause turbidity events at the Nossana spring.

Measurement, Monitoring and Reporting

- The plant's performance will be monitored through the measurement of water volumes treated during turbidity events, using dedicated flow meters. Data will be periodically reported by UNIACQUE.
- The water benefit generated by the project will be assessed annually by Bluerisk, which issues a certificate reporting the actual water benefit volumes achieved following its analysis.

Project progress and related monitoring indicators will be independently verified on an annual basis by a qualified third-party provider. The outcomes of this verification process will contribute to ensuring the transparency and reliability of the information disclosed.
